

OCEAN SLIME CRAFT

Materials:

- Clear Glue
- Borax
- Warm Water
- Blue Food Coloring
- Glitter and Sequins
- Sealed Storage Container

Note: glue and water will be a 1:1 ratio. For the purposes of these instructions, we are using $\frac{1}{2}$ cup or 4 oz. of each.

STEP 1

Dissolve 1 teaspoon of Borax into $\frac{1}{2}$ cup of warm water.

STEP 2

Add blue food coloring to the Borax and water solution.

STEP 3

Pour $\frac{1}{2}$ cup of clear glue into a mixing bowl.

STEP 4

Slowly, little by little, add the Borax solution to the glue, mixing or kneading as you go until the slime is thick and holds together. You may not need all of the Borax solution.

STEP 5

Add in glitter and themed sequins to your slime to make it sparkle!

STEP 6

Store in a sealed container.
